

DATA FLOW DAIGRAM AND USER STORIES

TEAM ID: PNT2022TMID41546

Solutions for smart cities, of course, go through IoT technology, making it easier for us to perceive objects and communicate. From day to day, countries, regions, cities, and municipalities embrace the “smart” systems and solutions in their operations. Accordingly, key waste management players are already operating with digitized solutions. So, IoT technology is a crucial step to embed in your operations.
