Methods

Server ⌄

Databases ⌃

Query a list of all database names in the instance

Query a list of all database names in the instance

Authorization

To call this method, you must be assigned one or more IAM access roles that include the following action. You can check your access by going to **Users** > *User* > **Access**.

- `cloudantnosqldb.account-all-dbs.read`

Auditing

Calling this method generates the following auditing event.

- `cloudantnosqldb.account-all-dbs.read`

Request

parameters

descending
boolean

Query parameter to specify whether to return the documents in descending by key order.

Default: `false`

endKey   Query parameter to specify to stop returning records when

Curl   Java   **Node**   Python   Go

```
getAllDbs(params)
```

Feedback

Example request

```
import { CloudantV1 } from '@ibm-cloud/cloudant';

const service = CloudantV1.newInstance({});

service.getAllDbs().then(response => {
```
